# Always at the top, never out of bounds

We pick you up at the door, transport to an airport and you shortly fly above clouds. You decide not only where, but also by which aircraft. We do not put air-taxi just on one aircraft, we use a lot of machines for transport. So we transport you comfortably all over the Europe.

At scheduling of you flight we consider plenty of technical factors such as metrological conditions, total weight or airport length, where we are supposed to land. We always conform to them with respect to your maximum safety and we never break bounds.

## Make yourself comfortable

You sit at the office at seven in the evening and think about the meeting in London you have to be at already tomorrow morning. A few glasses of champagne and catering on a board certainly encourage you to relax.

At your order of flight, we record all your wishes and before we start up engines, arrange, order and harmonize everything so that all things on the board would meet your expectation.

We wish you would have splendid feeling whenever you fly with us.

## We give you the full treatment

May you have any wishes, we fulfil them just on condition that they do not endanger the safety of you or a crew. We never break bounds and abandon our standards.

While you are sitting down on a seat and fastening your seatbelt you are sure that we have strictly checked the machine and every single part has been inspected.

### Rest assured

- we are holder of AOC certificate and fulfil all national and European standards related to commercial air transport
- we have been already flying for 25 years
- pilots never take chances and there is no changing it
- our machines are flown by experienced and regularly trained professionals
- we maintain machines ourselves
- air-taxi is not the only part of our business, nothing pushes us to break bounds

# As the crow flies

Little more than an hour and you can enjoy the sunset in Zadar in Croatia. You smile and tell that it was just yesterday you have had dinner with your business partner in London and today you are already strolling through the streets in Moscow.

And when you find a gap in your diary, our „turnkey flight“ will take you much further, on holiday and your travelling with excellent service is going to be a kind of a target.

# We are already flying!

Our helicopters land on various places in order to transport you to an important meeting or holiday abroad. We can combine a helicopter and an airplane for your journey. You will not meet with this at other companies. Thanks to a helicopter you can enjoy comfort of variable landing but always in the place which a pilot finds to be a hundred per cent safe.

Besides private flights, our air-taxi works also for "medical flights". We transfer the stabilized injured from holiday, we can move the patients from a heliport of one hospital to another both by a helicopter and an airplane. On the way we arrange complete service including medical attendance.

Air-taxi is definitely not only about flying with a glass of champagne in hands. We are here also for cases, when something unexpected flies into your life.

**Prove it.  
Fly with us!**
